RITRAMA GROUP

SELF-ADHESIVE MATERIALS

Ritrama was founded in 1962 in Milan by Arnold Rink as “Rink Trading and Manufacturing” and over the last four decades has become a leading producer of roll labelstock with its globally recognised brand and logo in the world of self-adhesive materials. International expansion began in 1982 with Ritrama (UK) Ltd. which has built up a significant position in the UK roll label market. This was followed by the US expansion in the 90s with the acquisition of two manufacturing facilities in Cleveland and Minneapolis, producing coating material for the North American screen printing and roll label markets. In 1994 a plant near Barcelona was acquired. This became Ritrama S.A. and now serves the Iberian Peninsula, focusing on filmic self-adhesive products, the so-called clear-on-clear market. Most recently, two new custom built plants have been established in Chile and in China at Hefei to cover two of the world's fastest growing markets for self adhesive materials.

RITRAMA GLOBAL SUPPLIER

Ritrama has developed an innovative business model capable of satisfying the growing demand of a global market. Plants have dedicated production, and logistics centres committed to slitting and distribution. Ritrama has established a world class network of sales support and logistics on an international scale capable of servicing more than 50 countries in the 5 Continents.

Ritrama today is an International Group active in the manufacturing, sales and distribution of commodity and speciality self-adhesive materials, grouped into 4 main divisions, with more than 750 people globally, and runs coating plants in the United States, Italy, the United Kingdom, Spain, Chile and China.

Roll-Label division

A wide range of self-adhesive standard and custom-designed products for roll label conversion

- Natural, coated and special papers for industrial labels, Food labels, Pharmaceutical, Household cleaning, Office products, Promotional Labels.
- Natural and coated paper papers for Thermal Transfer printing systems (logistic labels).
- A special face stock of natural, watermarked, matt and gloss coated, and metallised papers for wine labels.
- The most complete range of filmic face stocks on paper or filmic backing which includes Polypropylenes, Polyethylene, Polyesters, PVC, Acetates, Aluminum etc.
- A wide range of stock with two layers of adhesive on two release liners (Triplex Series).
- Security papers and films.
- A complete selection of adhesives emulsion and solvent bases as well as hot melt, for all applications from "Ultra-clear" to "Ultra removable" and from deep freeze to high temperature resistant as well as "Tailor Made" products for special uses.

PRODUCT

Industrial division

The range includes different products suitable for various applications in the industrial sector:

- Impact and non-impact computer imprintable films suitable for dot matrix, thermal transfer and laser printing.
- Security and tamperproof products including destructible vinyl.
- Speciality products for the Automotive Industry such as antireflection, stone guard, protective and decorative covering films.
- Self-adhesive films designed for 'stereo labels', realised with doming technology.

Visual Communication division

For Digital, Sign & Screen Media

Consisting of products for the screen, sign and digital markets, with end applications typically including outdoor advertising, point of sale & display and vehicle graphics.

■ Screen printing:

a wide range of self-adhesive materials in PVC, PET, PP and other speciality face stock supplied in sheets or on the roll for subsequent conversion.

■ Ri-Mark Sign Vinyl:

a comprehensive range of both cast and calandered self-adhesive coloured films for cad-cam/plotter use.

■ Digital:

consisting of an extensive choice of solvent inkjet media, overlaminating and mounting films.

DIVISIONS

Graphics division

Litho & Offset UV, Paper Sheet Media

A large range of commodity and speciality paper sheet materials for the offset-litho market.

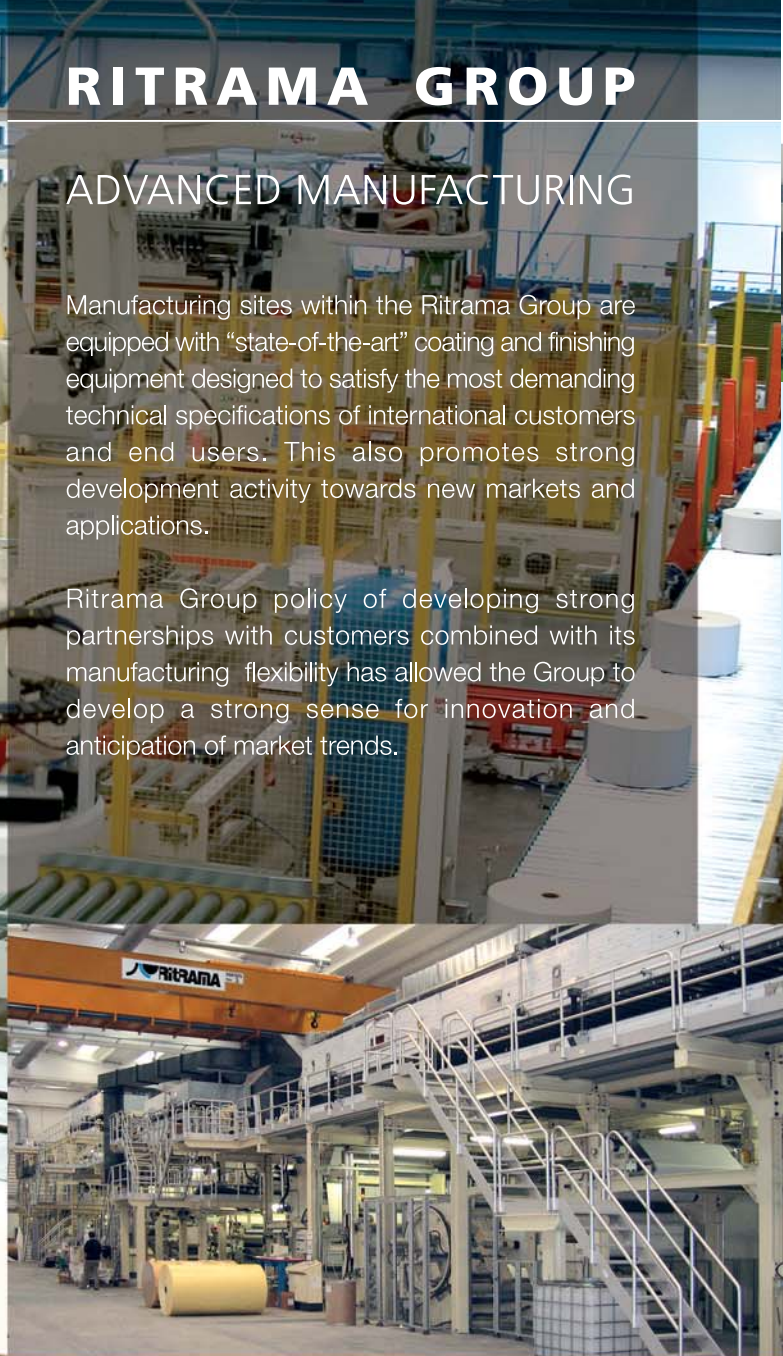

- Face stock available ranges from standard uncoated paper to coated and high gloss finish.
- Speciality papers such as fluorescent and metallised and selection of PVC, PET and PP.

RITRAMA GROUP

ADVANCED MANUFACTURING

Manufacturing sites within the Ritrama Group are equipped with “state-of-the-art” coating and finishing equipment designed to satisfy the most demanding technical specifications of international customers and end users. This also promotes strong development activity towards new markets and applications.

Ritrama Group policy of developing strong partnerships with customers combined with its manufacturing flexibility has allowed the Group to develop a strong sense for innovation and anticipation of market trends.

RESEARCH & INNOVATION

New products are developed in accordance and compliance with the Ritrama Corporate Quality System which is fully certified to International Standards - ISO 9001 and ISO 14001. Every plant has an effective local R&D Centre with experienced and highly qualified staff. Product testing can be customised to suit any specific application. Flexibility in production is accompanied by an excellent control over every stage of the production process. This is achieved by using well-trained operators of proven experience and sophisticated control equipment.
